Central or local governments

2.Where can it be found

- Open Data Service Platform at data.gov.tw

3. How to apply/obtain

- Users can download the NPM's images, high resolution images and exhibition packages through the NPM's Open Data Website. Users are welcome to download all images on this site for free and unlimited use with no applications required. Please refer to the "Open Government Data License, version 1.0" for more information. Users will need to apply for an API key to access the NPM's Open API.

4.Case of using

Title of the government entities :
Central or local governments

With air quality data and the service of mobile apps, the public can understand the air quality index in the place they stay to keep abreast of air condition and make preparations against pollution in advance. The application also provides suggestions of current air pollution.

With the data in Government Open Data Platform and inquiry service of mobile apps, the public can directly consult the selling market conditions of each daily produce. Besides daily conditions, it also provides price trend charts of each produce in 7 days, 14 days and 30 days.
